- Siting Considerations & Marina Design
- Marina Facilities & Habitat
- Stormwater Management
- Boat Maintenance
- Petroleum Control

- Sewage Handling
- Waste Mgmt & Recycling
- Marina Mgmt & Boater Education
- Aquatic Invasive Species
- Complete the Course

# Example Page

## Petroleum Control Unit

- ◆ **Section 1:** Preventing Spills at the Source
  - ◆ Specific learning objectives – see example below
- ◆ **Section 2:** Emergency Preparedness

### Learning Objectives

By the end of this section, you should be able to:

- Understand the importance of safely storing, using and transferring oil and oil-based products.
- Describe several ways you can eliminate or reduce fuel spills and leaks.
- Educate employees and boaters about smart fueling and spill-prevention techniques.
- List equipment, practices and services you can use to help keep petroleum and fuel out of the water at your marina.

## Certification Checklist

Follow your state's Certification Checklist while going through the Classroom to ensure you understand what is required for certification in your state.

## Clean Marina Classroom

### Welcome

Welcome to the Clean Marina Classroom — an online course for marina owners and operators interested in pursuing Clean Marina certification. The Clean Marina Classroom focuses on best management practices for marina managers and operators to protect water quality. This self-paced course includes checklists, educational units and a review of relevant laws and regulations that address pollution prevention. Completing the Classroom is a key part in becoming certified.

### Access the Course

**New users, please register:** See the *Course Registration* link along the side of this page. The Clean Marina Classroom is specifically designed for Clean Marina certification programs. We encourage all course participants to work through their state Clean Marina program representative to ensure that they are addressing the appropriate certification criteria. See affiliated *Clean Marina programs* for more information.
